DRUG INFORMATION AND PATIENT COUNSELLING CENTRE

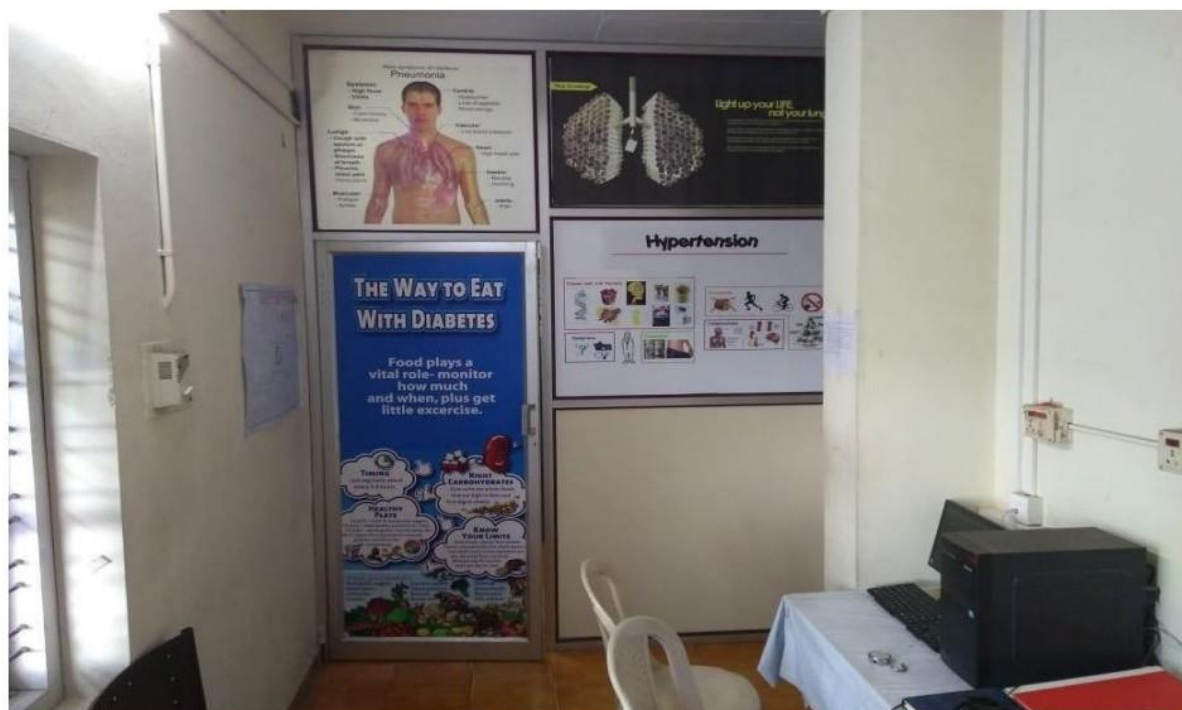

Our college is associated with superspeciality medical college Hospital, where the Clinical training of Pharm D and M. Pharm students is conducted by expert teams of clinicians. Now a days irrational and unnecessary drug prescribing is very common and antibiotic resistance is widespread so in this scenario the college is efficiently running a Drug Information Centre in order to provide necessary information regarding the drug its indications and its major side effects among the patients and it is under the guidance of the Pharmacy Practice department of our institution. A well-organized Patient counselling Centre is also working there.
