He explained that Career Counseling is a process that will help students to know and understand themselves and the world of work in order to make career, educational and life decisions. Selecting the right career is very important as

career spans one's adult life and defines an individual, the kind of lifestyle one has, the people one interacts with. In short one's career has an impact on the quality of one's life. He also emphasized that applying for higher education abroad is a critical decision, both financially and emotionally. Therefore, it is mandatory to invest adequate time and effort in order to make the right career decision. He compared education in India and abroad in aspects of exposure, way of teaching etc.

Elaborating his concepts, he listed some countries (like UK, Canada, New Zealand, Australia, Ireland, Quebec and Germany .) which are popular educational hubs and the world class universities.

He listed the various reasons to choose to study abroad rather than in India. One of the reasons is the campus life, one gets to experience through the time period.

He further guided the students on how to get admissions in the Universities in abroad and helped students to gain authentic information on career centric programs in top foreign institutions, scholarships, internships, stay back, permanent residency, part time, full time job and so on.

He advised the students to maintain some key points in our academic life. These key points would further help the students to get extra points while trying to get through admission procedure. Later he apprised about the examination like IELTS and TOEFL.

The session concluded with a questionnaire that has to be filled up by the

students. The career counselling workshop gave an insight to the students
for their further prospects

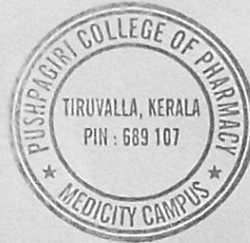

The function ended at 4.00 pm with the vote of thanks by Mrs. Sreekavya.B,
